Early Beginnings; Starting in 1976 North Carolina State University Raleigh N.C. USA, our fusion focus from day one as top world scientist engineer consultant architects was to create an all digital electronic driven no paper fully robotic automated crime free society. We have succeeded as of 2011 timeframe by construct engineering and deploying the most comprehensive and even simple systems that unify mankind once everyone in world now knows WHO is WHO, WHO owns WHAT, WHO trades WHAT with WHO and GPS tracked when and where. FOIA.ONE Evote.one is part of UNlocracy.org new world replacement market system that is 100% hack proof and can never be infiltrated by any cyber criminal or network.

Our focus was amateur radio W4ATC and the deepest study of mainframe operating systems at all levels of databases, computational matrix decision analysis, creating 3rd and 4th generation computer languages mostly in Assembler on IBM 370/165, then PDP 8, then immediately taking Electrical engineering courses on micro electronics hardware, software, and of course the underlying data communications protocols that run our entire world. These are known collectively as Programmable Logic Controllers. Our key achievement is TurnOffLights.SPACE that is all electronic interconnected data communications and related FOIA.ONE database that are the ultimate simple format of cluster network data exchange of all data in the world.

1981 BB&L Industries was startup in Atlanta Georgia as we produced the worlds most state of the art Paging and voice retrieval systems in the world.

1983 Rollins Inc as I worked directly for President Randal Rollins specifying at the lowest to top levels their new 40,000 unit ITI Security system and monitoring central station software and hardware. After 9 months, I saw they were not going to invest in the required in house development group that I was leading.

1984-1989. Digital Communications Associates. As top key member of their engineering design production teams, I as the International Design engineer as we are the top scientists who created key components of all inter connected banking, finance, phone company, stock market, and data communications protocols and high speed dedicated hardware interconnecting the new IBM PC technologies, the AT&T UNIX systems, and IBM and DEC mainframes worldwide. I traveled extensively in Europe by creating the automated international language translation of all software systems of IRMA and SMART ALEX.

1989- 1992. As top key consultant of Broadway & Seymour, we were the top world consultants on the IBM high speed check sorting systems, then the famous IBM DataTrade system that was the worlds first computer independent software system that transmitted any data (mostly banking) from any

hardware based computer at PC, midrange, to Mainframe level using only ONE major source code repository that was written in 100% generic cross compilable C language. We also worked at Dupont on their factory automation systems.

1993-1994 SunGard Trust Systems Birmingham Georgia. Our small teams created and deployed the most expensive Portofolio management investment and tracking system at that time. Managing billions of USD/Euros through IBJ, Integrity bank, and of course all the huge customer bases of IBM and other banking consolidators like Carnage Mellon.

1995-1996 AT&T (Bellsouth) We were the core consultant teams who designed AT&T's replacement construction Management supply chain system of OSPCM. In less than 1 year we were fully operational after designing their new system from ground zero.

1996-1997 AT&T (Bellsouth.com) Long Distance. Our top consultant teams were the original designers of their very first long distance billing system we designed from ground zero. We were operationally in less than 1 year as our work dealt with millions of call detail records and the wholesale billing to sub vendors and interconnections with all other phone companies.

1998-2004 bellsouth.com As top consultant, we were the lead consultant architects of the prime mainframe to web portal Bellsouth billing and product/ service procurement site managing over 70 mainframe services for 24x7 service availability. We had the highest usage rate of any world corporation including Google, Amazon, IBM or any others. We had the lowest failure rates because our prime focus was on sustainable tracking of all software modifications and predictive analysis software systems to prevent major computer malfunctions and shutdowns.

2005-2007. Datatrade that services almost all Toyota and other major brand auto showrooms.

2008-2011. Is the most incredible verifiable years when we were asked to partnership with the top Home/business highest end electronic automated system vendor in Atlanta GA. After being defrauded of \$109,000 USD, we embarked on the most positive profitable journey of all time. HOW to UNIFY mankind by create publishing the required HOW-TO produce almost free electric energy worldwide with TurnOffLights.SPACe, SolutionSafeWater.org.

Sept 2011 to Jan 2014 were extreme educational publishing period of the inside of our very own Judicial system at all levels. Our resume and most broad spectrum experience is so extreme that we have not the time to keep repeating the most obvious fact of all.
